

BIGHELP NEWHAMPSHIRE SCIENCE FAIR

APRIL 20, 2019 AT 11:00 AM - 3:00PM

A wonderful opportunity for your child to experience, discover, and have fun with the exciting worlds of Science, Technology, Engineering & Math. It allows our Student Scientists to demonstrate their interests with parents and fellow students!

The Science fair is not a competition - there are no awards. Every student will receive a Certificate of Achievement.

Students can participate as individuals or on teams (2 students per team is preferred, teams can be a maximum of 3 due to space limitations) .

Teammates do not need to be in the same grade. The Science fair is for students to **HAVE FUN** with science, technology, engineering and math!

- Provide a tri-fold display board for each project
- Have your child select a project that is both interesting to them and that allows your child to be an active participant. There's science in just about everything we do.
- Science is all about asking questions, no one asks better questions than an elementary school child!
- If your child is having difficulty selecting a topic, you can check with our coordinators.

Important Ground Rules for Science Projects

- ✗ No Hazardous Chemicals
- ✗ Nothing that needs an electrical outlet. (You may bring a battery pack.)
- ✓ Keep it simple and inexpensive by using donations, recyclables, and items from home.

REGISTRATION INFORMATION : There is no participation fee for the science fair.

Students interested in participating in the science fair will need to register online at www.bighelp.org.
